PROFILE

Dynamic full stack web developer skilled in MERN stack, adept in JavaScript, Node.js, and React.js. Excels in team collaboration and problem-solving, leveraging. Quick to master new technologies, ensuring efficient, scalable, and reliable web applications.

SKILLS

- HTML
- Css
- JavaScript
- React
- Node js
- Express js
- Mongo DB
- SQL
- Firebase
- Python
- ML - Linear Regression
- ML - Logistic Regression

EDUCATION

Full Stack Development
Masai School
06/2024 – 02/2025 | Banglore

BSc IT Hons
Kurukshetra University
Kurukshetra

PROJECTS

Roar AI 🔗
github 🔗

- Roar AI is a smart conversational web app inspired by Gemini AI, built using React.js, HTML, and CSS.
- It features a responsive chat interface that simulates intelligent dialogue with users.
- The UI is clean, dynamic, and designed with modular React components.
- State and interaction are handled using modern React hooks.
- Roar AI can be extended with AI APIs for real-time intelligent responses.

Tech Stack : HTML, Css, JavaScript, React, Gemini API Key

Quiz-App 🔗
github 🔗

- Developed a dynamic Quiz App using React.js with interactive question-answer flow.
- Implemented state management using React hooks (useState, useEffect) for real-time updates.
- Designed responsive UI with HTML and CSS for seamless user experience across devices.
- Enabled score tracking, question navigation, and result display features.

Tech Stack : HTML, Css, JavaScript, React

Contact Manager 🔗
github 🔗

- The Contact Manager is a dynamic web application built using ReactJS, Firebase API, HTML, and CSS. This application empowers users to efficiently manage their contacts with a user-friendly interface and robust backend integration.
- Comprehensive Contact Management: The application allows users to manage contacts effectively, offering features like sorting contacts by username (ascending and descending) and filtering them based on specific tags.
- CRUD Functionality with Firebase Integration: Users can create, edit, and delete contacts seamlessly, leveraging Firebase API for real-time data storage and updates

Tech stack : HTML, Css, JavaScript, React, Firebase

E-commerce Product Catalog 🔗

- The E-commerce Product Catalog is a web application designed to showcase a dynamic catalog of products, offering users an intuitive browsing experience. Built using JavaScript, HTML, and CSS.

Tech Stack : HTML, Css, JavaScript
